

TASK 3 – RESPONSIBLE AI AND MODEL INTERPRETATION.

1.OBJECTIVE:

***To understand fairness, bias and responsible use of AI models.**

2.PYTHON CODE:

```
import pandas as pd
import matplotlib.pyplot as plt

# Sample data
data = {
    'Gender': ['Male', 'Female', 'Male', 'Female', 'Male'],
    'Prediction': [1, 1, 0, 1, 0]
}

df = pd.DataFrame(data)

# Count predictions
result = df.groupby('Gender')['Prediction'].sum()

print(result)

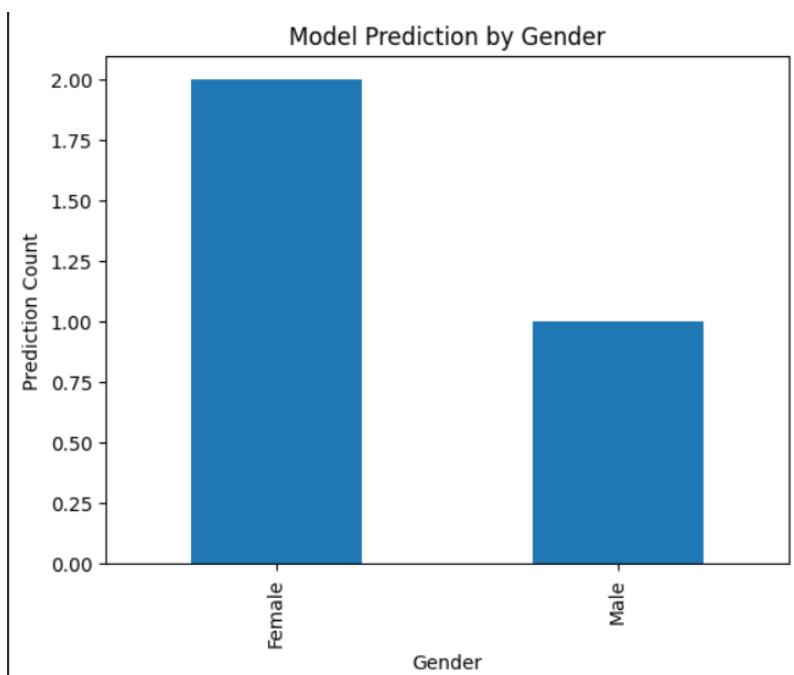

# Plot graph
result.plot(kind='bar')

plt.title('Model Prediction by Gender')
plt.xlabel('Gender')
plt.ylabel('Prediction Count')

plt.show()

print("Responsible AI: Check fairness and avoid bias in AI models.")
```

3.OUTPUT:

4.FINAL OUTPUT:

Gender	
Female	2
Male	1

Responsible AI: Check fairness and avoid bias in AI models.

5.CONCLUSION:

- *AI models should avoid bias and treat all groups fairly.
- *Responsible AI helps create fair and reliable systems.
